PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/795,843	Applicant(s) NAKHASI ET AL.	
	Examiner Carolyn A. Paden	Art Unit 1761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The rejection of the claims over Seiden (5,288,512 and 3,596,673) has been withdrawn in response to applicants' amendments to the claims. Also the rejection of the claims over Nakhasi under obviousness type double patenting has been withdrawn in response to applicants' amendments to the claims. There is no suggestion in the Nakhasi claims to fortify the pan release cooking composition with phytosterols ester.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over van Amerongen (6,117,475) in view of Seiden (3,595,673) and as further evidenced by Yang (4,832,875) and Swern.

Van Amerongen discloses phytosterols ester for use in foods that include margarines. The claims appear to differ from van Amerongen in the recitation of the inclusion of interesterified medium chain fatty acids in the fat. Seiden discloses a fat that is an interesterified fat containing medium chain triglycerides. It would have been obvious to one of ordinary skill in the art to the fat composition of Seiden in the composition of van

Amerongen in order to provide an added health benefit of improving one's lipid profile, as described by Yang at column 4. It would have been obvious to one of ordinary skill in the art to expect the composition of van Amerongen with the medium chain fatty acids of Seiden to provide the known health effects of both of the ingredients of the composition. It is appreciated that the references do not disclose the viscosity of the structured lipid component but the viscosity of oil is an inherent feature of the composition. Swern is cited for evidence, in the figure at page 180 and discussion on page 179, that triglycerides are known in the art to provide a viscosity of between 20 and 52 centipoise. Given the evidence of Swern, it would have been obvious to expect the structure oil of Seiden to possess the viscosity of the claims.

No claim is allowed.
